Introduction

Give your brand the web presence it deserves with the number #1 Odoo theme in the market: Theme Scita. One of the most elegant themes which is developed keeping 20+ industries in mind. We've designed this theme considering e-commerce, healthcare, fashion, finance, and many more industries. It is perfect for every business. Designing your website has never been this easy with our theme Scita.

Benefits of Odoo Theme Scita

- Helps in ranking your business higher with faster page loading speed.
- Theme Scita includes powerful megamenu, drag and drop snippets, elegant header footer options, and more.
- It is well-coded, organized, and modular to help you get the aspired look for your website.

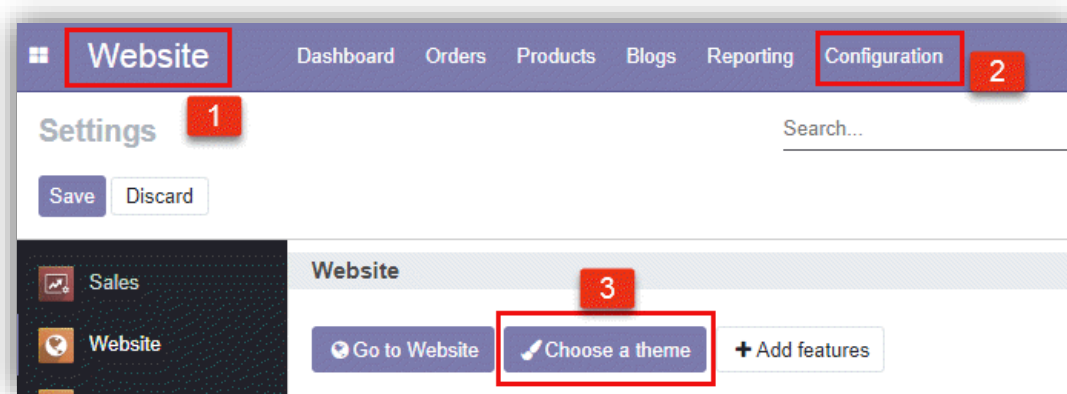

Pre-requisites

- Following points must be followed before starting the plug-in installation:
 - You should login as an Admin in Odoo.
 - Check that your Odoo Instance is compatible for Scita Theme.
 - An e-commerce module should be present in your instance to use this theme.

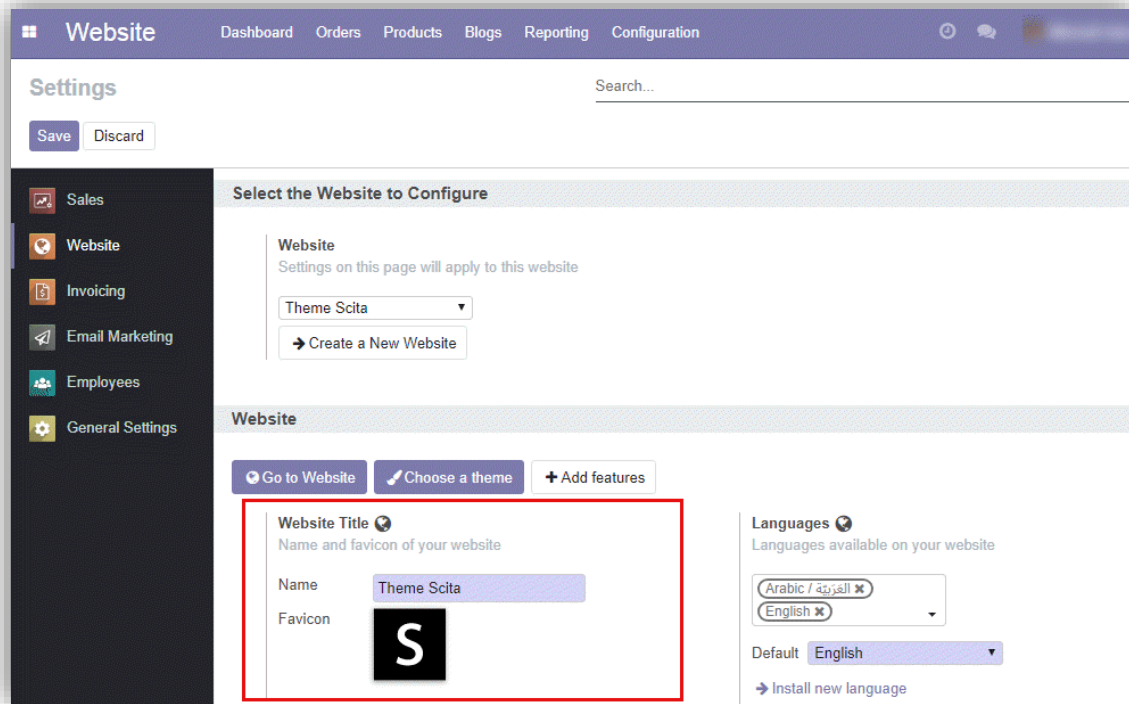

Installation

Installation Steps

- Download the latest Odoo version. Go to website record and install Theme Scita from there.
- Download Theme Scita from Odoo store. Once downloaded, you will get folder with the name 'theme_scita'.
- You need to add this folder in your addons directory and restart the Odoo server instance and update your App List.
- Now go to **Website > Configuration > Settings**. In website settings, select a website in which you want Theme Scita to be installed.

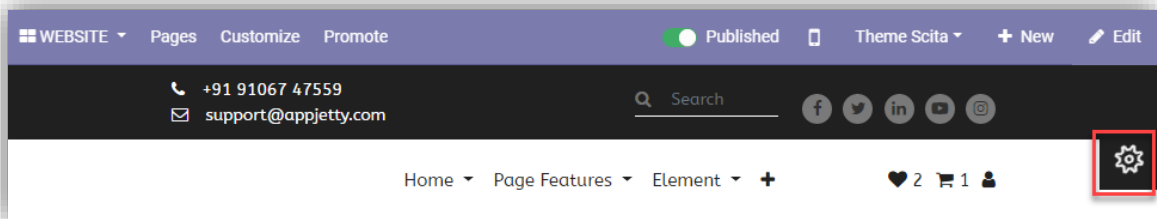

- Click on 'Choose A Theme' button. On clicking, you will get redirected to list of themes available. Click on Theme Scita to install it in your website.
- After selection, click on **Save** button to save the changes.
- After installation, you can see theme details under the website section.

Theme Configuration

Customize Theme

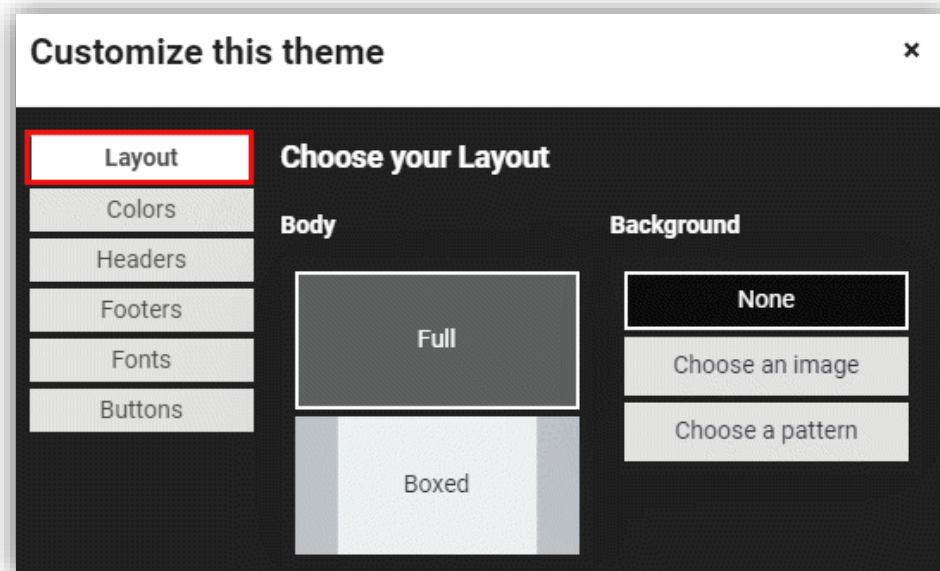

- After Installing the theme, Go to **Website** and click on the gear icon which is on right side of the page.

- Clicking on gear icon, it will open pop up box with different tabs like Layout, Colors, Headers, Footers, Fonts and Buttons to set/change the theme styles.
- From the available options, set the option which suits best for the website.

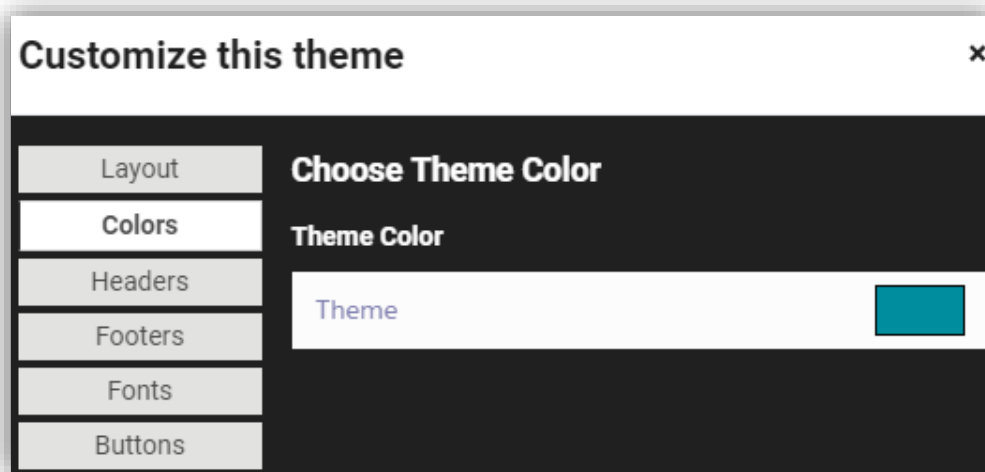

Customize Layout

- You can customize the layout of your website based on your needs.
- Under layout, you can select body and background for your website.

Customize Color Options

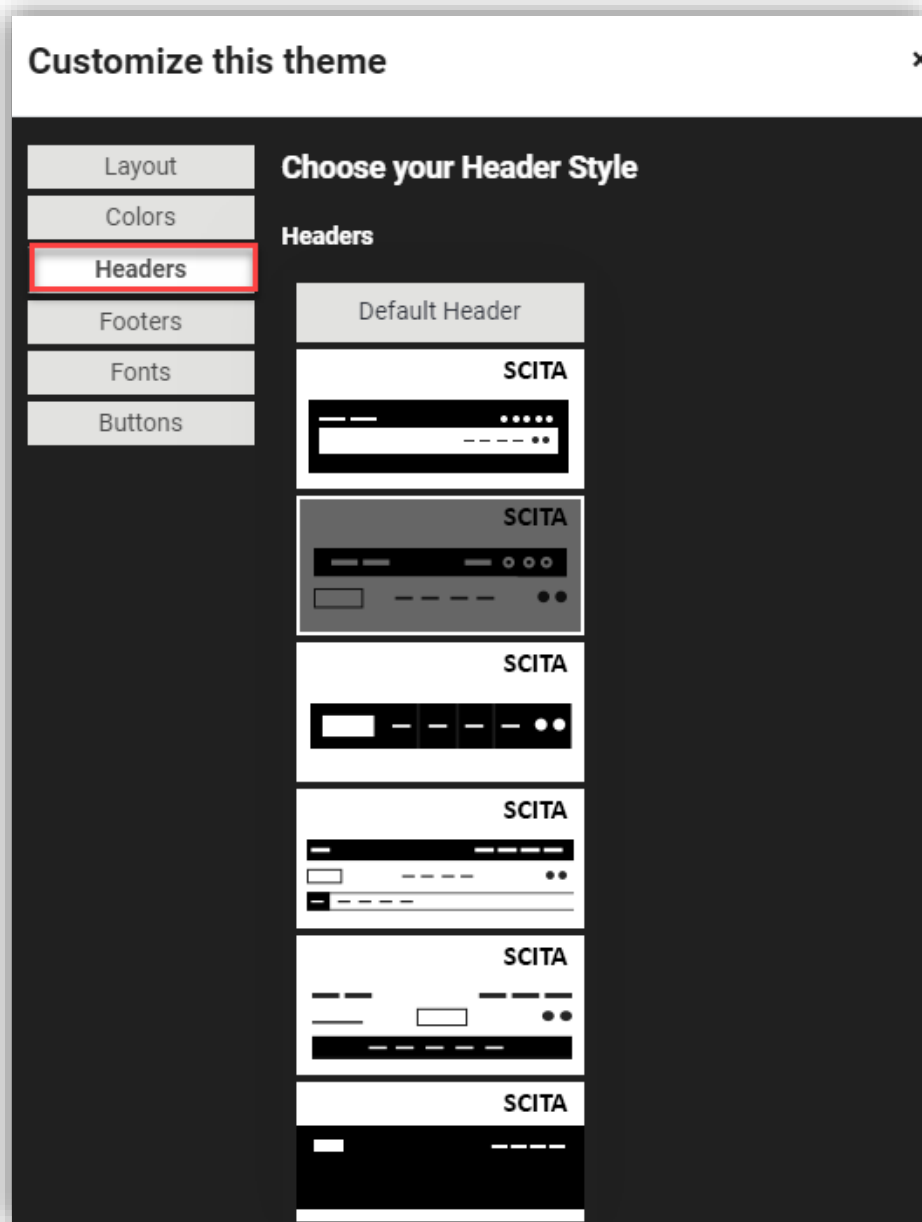

- User can customize their website as per their brand's color scheme.

- Click on colors tab, it will show color picker to select theme color.

Customize Header Style

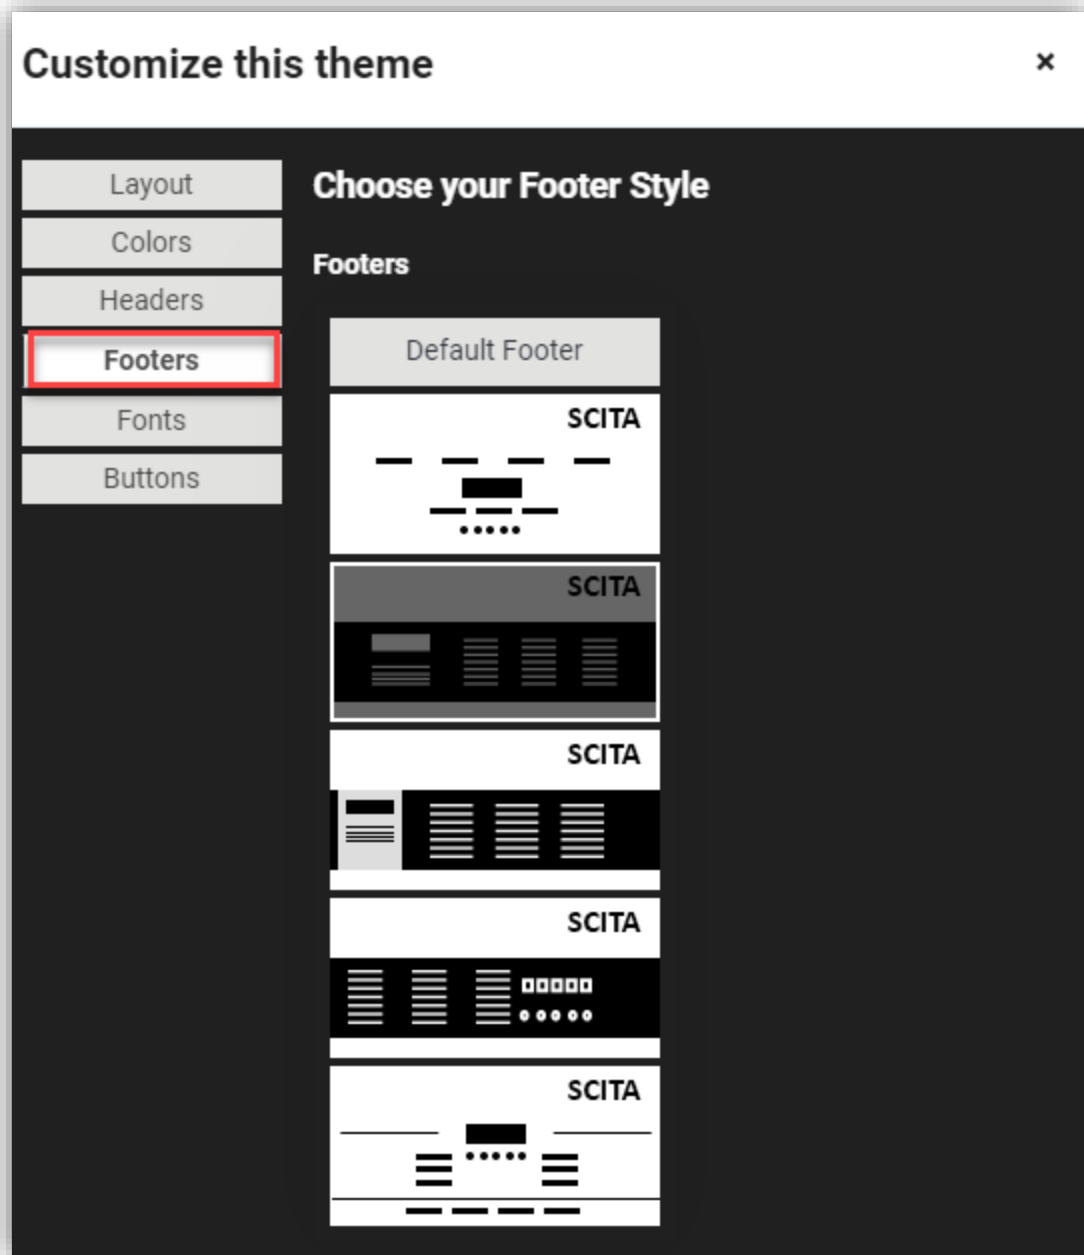

- User can customize header as per their requirement. Mainly there are six different header style options available in theme scita.

- Clicking on **Headers** tab, it will show different header styles to choose from.
- Select the style which suits best for you.

Customize Footer Style

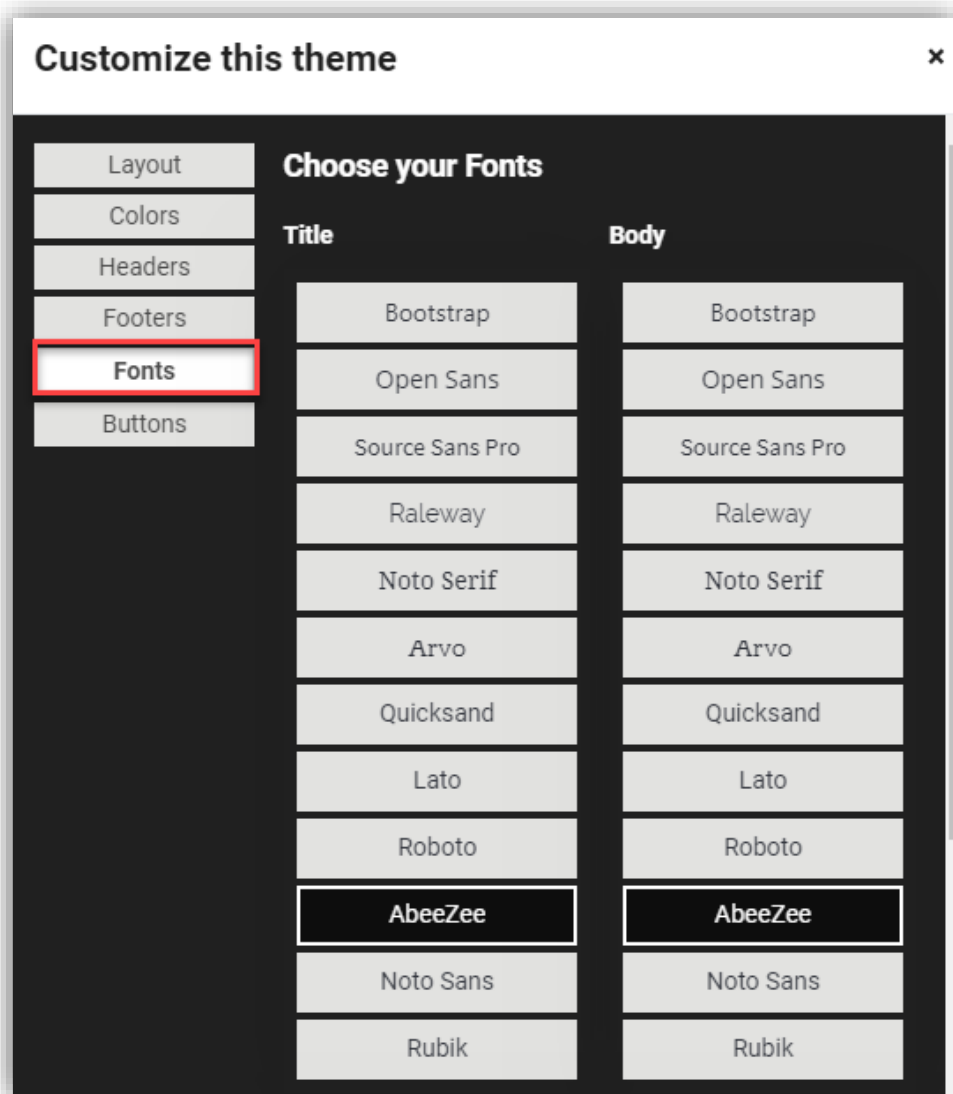

- User can customize footer as per their requirement. There are five different footer options available for theme scita.

- Click on **Footers** tab, it will show different footer styles to choose from.
- Select the style which suits best for you.

Customize Font Style

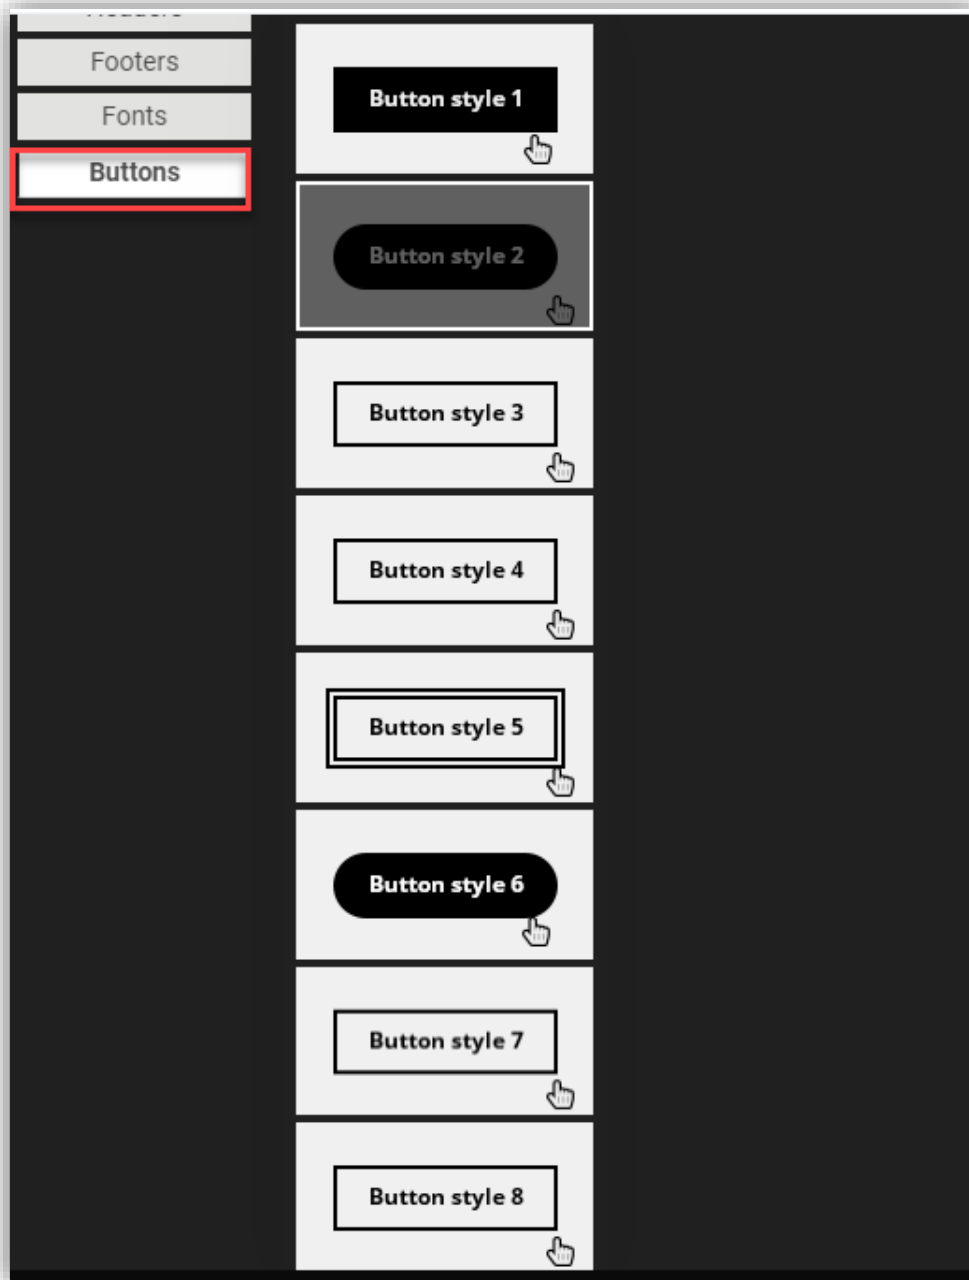

- User can customize font style as per their requirement. There are twelve font styles available. Fonts can be managed for Title, Body, Button and Navigation Bar.
- Click on **Fonts** tab, it will show different font options to select from.

Button	Navbar

Configuring Category Slider Snippet

- To use this snippet, first you need to configure the category sliders from the backend admin section.

- For that go to **Sales -> Slider Configuration -> Category Slider Configuration**. You can create records with your required categories.

A screenshot of the 'Category Slider / New' form in Odoo. The form has a 'Save' button and a 'Discard' button. It contains a 'Slider name' field with the value 'Best Footware', an 'Active' checkbox which is checked, and a 'Collections of category' dropdown menu.

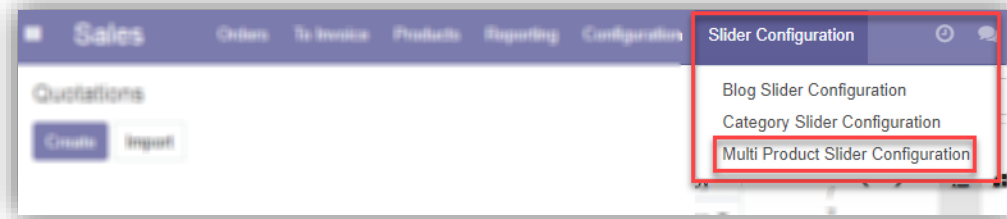

- Now you can use this snippet by switching to the website with admin rights or similar.
- Go to **website** -> Click on the **Edit** button available on the top right corner. Upon clicking, snippet panel is shown on left side of window.
- You can scroll it to the Theme Scita section and select Category Slider snippet. Just drag and drop to the position where you want to place.

A screenshot of the 'Category Slider Configuration' dialog box. It has a title bar with a close button (X). The main content area has a 'Type' label and a dropdown menu showing 'Trending'. At the bottom right, there are 'Cancel' and 'Apply' buttons.

- It will show a pop up to select record which you want to display on the website.

Multi Product Slider Snippet

- To use this snippet, first you need to configure the same in backend admin section.

- For that go to **Sales -> Slider Configuration -> Multi Product Slider**. You can create records with your required categories or products.

- It will show a pop up to select total count of brand which you want to display on the website and label from where you can define a title.

Client Slider Snippet

- To use this snippet, first you need to create record of specific customer in backend admin section. You can do that by navigating to **Sales -> Orders -> Customers**.

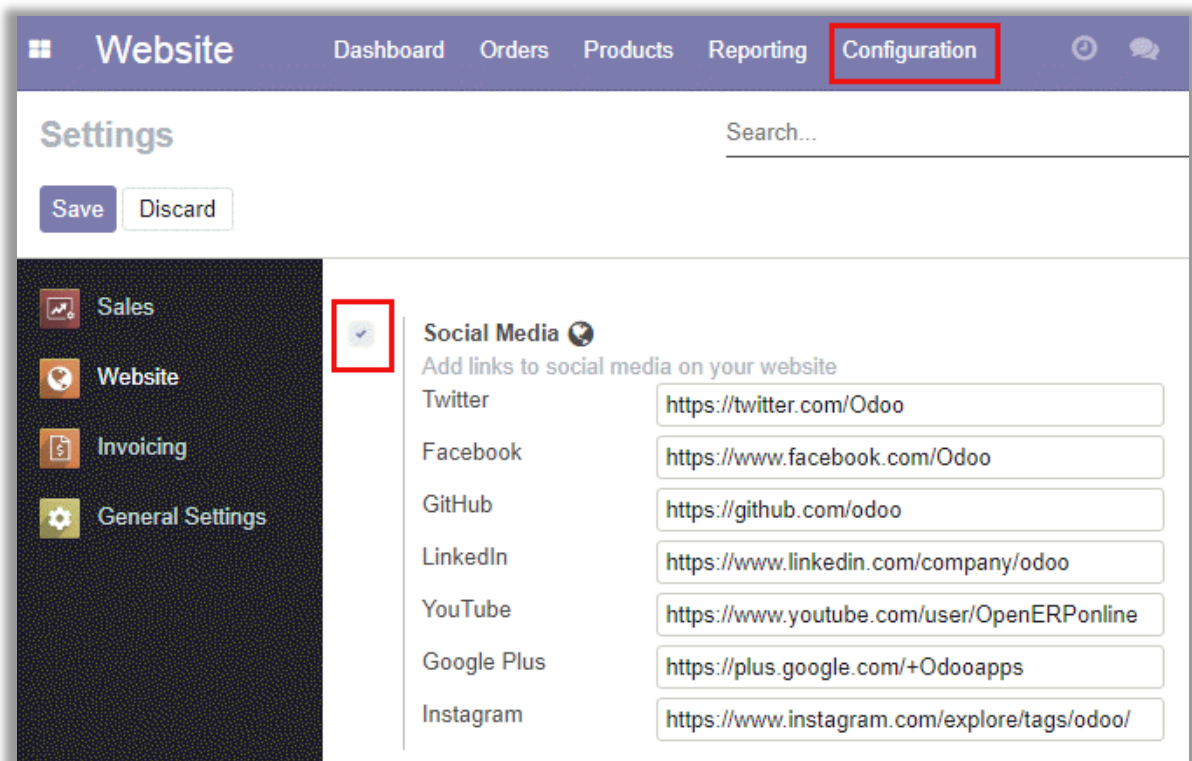

- After creation, open that record and mark checkbox as true named 'Add to client Slider'.

The screenshot shows the 'Customers / New' form in Odoo. At the top, there are 'Save' and 'Discard' buttons. Below them, there is a section for 'Individual' and 'Company' types. To the right, there are summary statistics: Sales (0), Invoiced (0.00), Analytic Acc... (0), Credit card(s) (0), Unpublished On Website, and Active. The main form fields include Name, Address (Street, Street 2, City, State, ZIP, Country), Phone, Mobile, Email, Website, Tax ID, and a checkbox labeled 'Add to client slider' which is checked. Below the form, there are tabs for 'Contacts & Addresses', 'Internal Notes', 'Sales & Purchases', and 'Invoicing'. At the bottom left, there is an 'Add' button.

- Now you can use this snippet by switching to the website with admin rights or similar.
- Go to **website** -> Click on the **Edit** button available on the top right corner. By clicking that, a snippet panel shows on left side of window.
- You can scroll it to the Theme SCITA section and find different Client slider variations. Just drag and drop to the position where you want it.

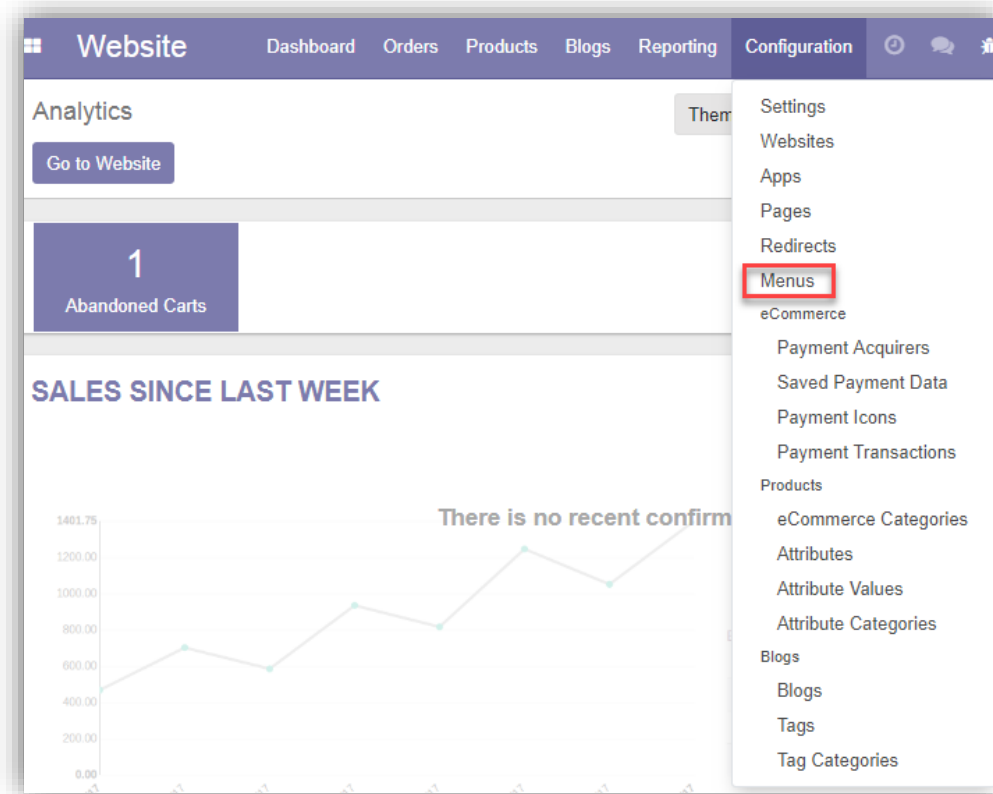

Social Media Configuration

- Social media icons are available on the top left corner on the website which are configurable from backend.
- For configuring Social Media links, go to **Website > Configuration > Settings**. There navigate to social media section under website section. Check the checkbox to add links to social media on website. Also, user can edit these social media links.

Configuring Mega Menu

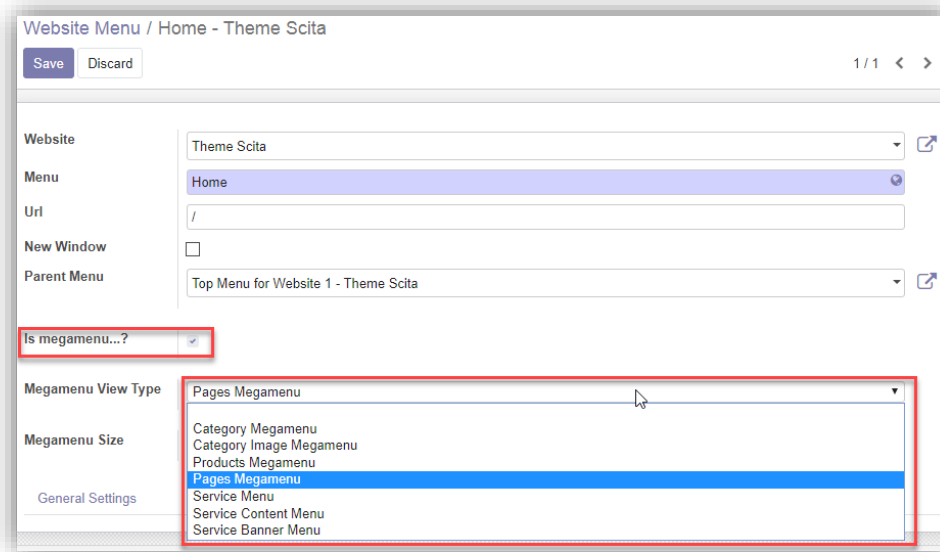

- User can customize their mega menu as per their requirement. For that first user needs to enable developer mode. Go to Settings > Activate developer mode. (on right end side)
- Go to Website Admin -> Settings -> Configuration -> Menus. Create a new menu or open any existing menu which you want to set as mega menu.

- On selecting any menu, you get options like Website, Menu, URL for Menu, New Window check box to open menu in new window, parent menu selection and menu position in website.
- If you select top option in menu position field then that menu can't be megamenu. To make that menu as mega menu, you have to select menu position as bottom. Then you will get an option which you can enable to make it mega menu.
- If you select that option, then you can set configuration as per your requirement.

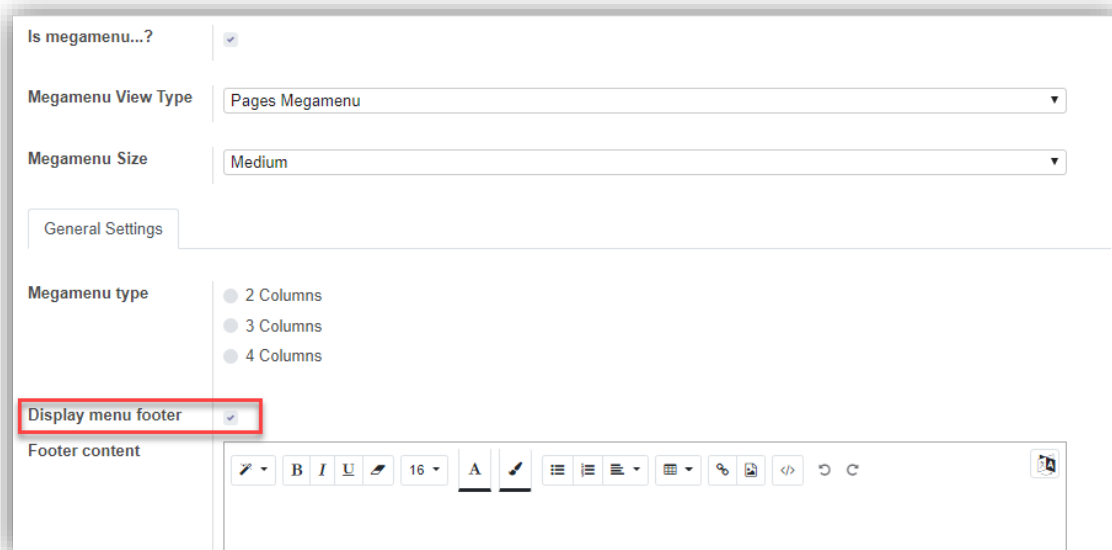

<input type="checkbox"/>		Website	Menu	Is megamenu...?	Url	New Window	Parent Menu
▼ Theme Scita (65)							
<input type="checkbox"/>	+	Theme Scita	Top Menu for Website 1	<input type="checkbox"/>	/default-main-menu	<input type="checkbox"/>

- You can choose from different megamenu types like Category Megamenu, Product Megamenu etc.
 - **Category Mega Menu:** - To display Mega Menu as per the categories.
 - **Category Image Mega Menu:** - To display Mega Menu Category images in the Mega Menu.
 - **Product Mega Menu:** - To display Mega Menu as per the products.
 - **Pages Mega Menu:** - To display page categories in Mega Menu.
 - **Service Menu**
 - **Service Content Menu**
 - **Service Banner Mega Menu**

Configure Advance Mega Menu

- Special Features in which advance mega menu contain below special features
 - **Category Slider:** - To display sliders for category in mega menu.
 - You can also configure 'Slider Label', 'Category Slider Position'.
 - Enable display Menu Footer and enter the text for footer in 'Footer Content' text area.

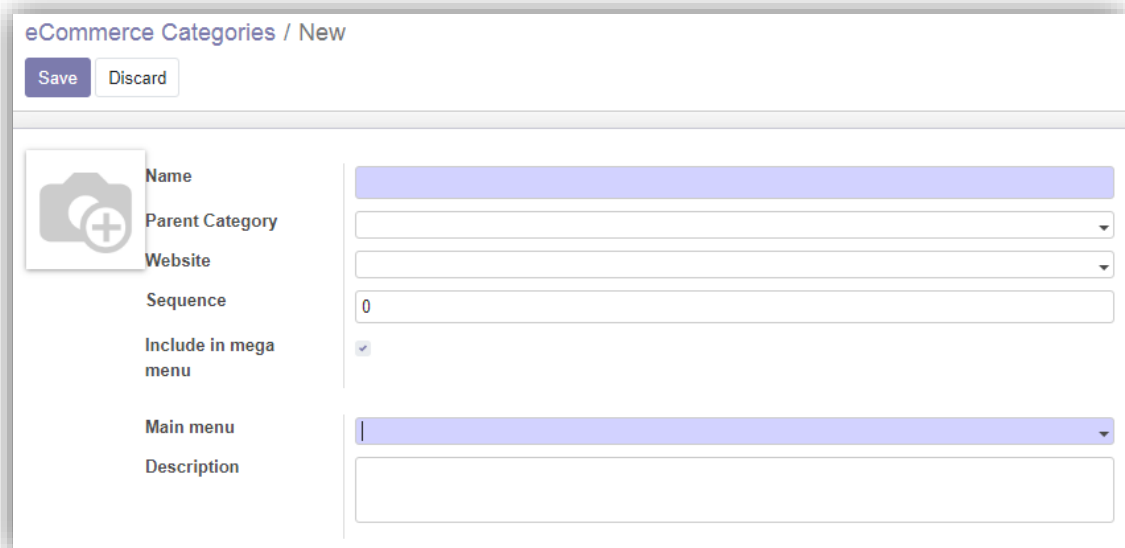

Configure Mega Menu Categories and Subcategories

To create category: -

- Go to Website Admin -> Configurations -> Products -> eCommerce category. Now click on 'Create' button to create product category.
- By entering a name of category, you can create main category and to include it in mega menu click on 'Include' button.
- To create category, set main menu as menu based on your requirement.
- In mega menu list, you can also give sequence number to decide the sequence.

To create Subcategory: -

- Enter name of category and choose category name in which you want to create subcategory.
- You can also give sequence number to decide the sequence.

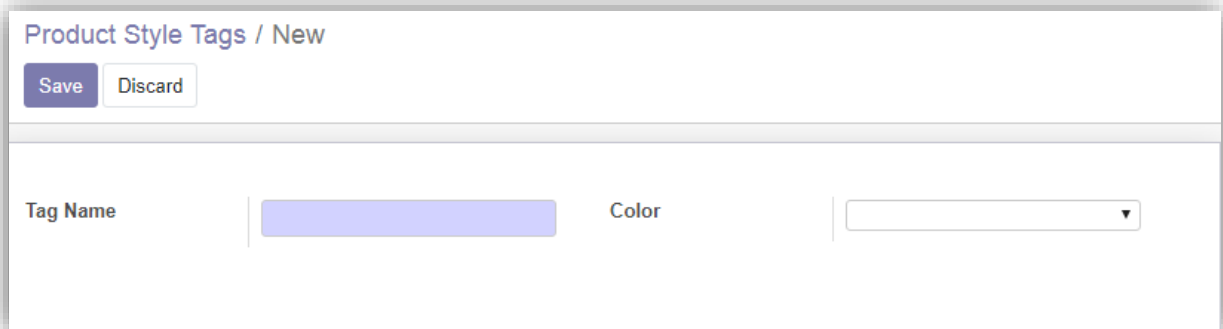

The screenshot shows the 'eCommerce Categories / New' form. At the top, there are 'Save' and 'Discard' buttons. The form is divided into two columns. The left column contains a sidebar with a camera icon and a plus sign. The right column contains the following fields: 'Name' (text input), 'Parent Category' (dropdown menu), 'Website' (dropdown menu), 'Sequence' (text input with value '0'), 'Include in mega menu' (checkbox, checked), 'Main menu' (dropdown menu with value 'Menu'), and 'Description' (text area).

Note: If you enter category name and not select parent category then by default that category will also be included in mega menu. In such a case, that category will by default will be a parent category.
